DOORS AND WINDOWS

THE
SOHO
EXTERNAL DOOR

The Soho
External Door
is an expression
of sophistication,
style and security
into every home
it graces.

Soho - a design to inspire...

Manhattan's Soho is a place of artistic expression and historic architecture.

The neighbourhood – famed for creativity, culture and imagination – has offered the perfect design inspiration for Origin to be able to craft a cutting-edge door design that accommodates today's way of living.

The Soho External Door, therefore, encapsulates the essence of one of the most iconic districts in the world and is synonymous with style and sophistication.

Industrial, modern, magnificent...

With sightlines of just 36mm, the Soho External Door ensures your home gets it all – expansive glass panels for maximum light, elite levels of security and remarkable aesthetics.

Being able to accomplish this design and for it to perform flawlessly for decades to come is only achievable with a delicate combination of special elements. Our aluminium is of the highest-grade, which not only is strong, secure, and stunning, but is able to accommodate large complex layouts and configurations.

Future Homes, today...

Given that our products connect your world to the natural one outside, we want to do all that we can to protect it, for current and future generations. Our ethos of continuously improving our products is demonstrated by the fact that we are already 2025 Future Homes Standard compliant today for thermal efficiency, highlighting that we're leading our industry in aesthetics and performance.

Steel-look design meets
unparalleled thermal performance.

Tailored just
for you...

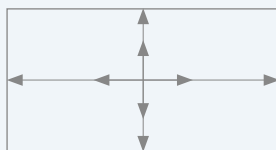

The Soho Exterior Door is precision made to your requirements.

Once you've decided Origin is the right choice for your home, head over to origin-global.com to find your local Installation Partner who will bring your vision to life.

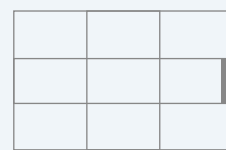

Work with your chosen Origin Partner to specify every single detail. And, if instructed by you, they will direct us to create the work of art that is the Origin Door.

Whilst our Installation Partners are all independent companies, they're offered full training by Origin. This means that they're able to provide you with a luxury product that's complemented by a reliable, professional and helpful service. Since your chosen Partner will look after everything to do with the Door's installation, please discuss the process and all costs directly with them.

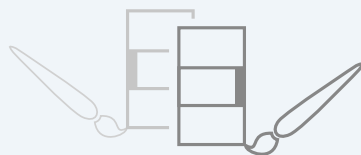

Overall size – your Installation Partner will survey to confirm your overall aperture size

Number of doors – individual doors can be between 325-1,000mm wide and up to 2,376mm high

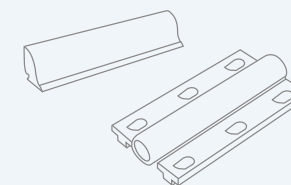

Configuration – specify the direction of the doors and how they open to ensure they work for your space

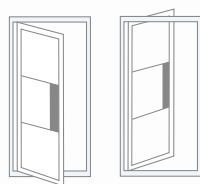

Single or dual colour – select a colour for your Doors, and whether you want the same hue inside and out or different

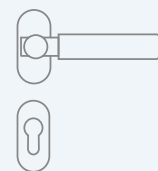

Threshold option – opt for a track choice that suits you and your installation. The choice is usually based on where the doors will be installed

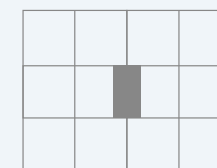

Accessory finishes – opulence isn't opulence without the ability to have colour coordinated accessories

Open in or out – the doors can be hinged to open inwards or outwards, whatever is best for your space

Handle – choose from a stunning selection of handles as the sublime finishing touch

Glazing bars – more will provide a heritage design, whilst less will provide an industrial and minimalist look

Frame your surroundings...

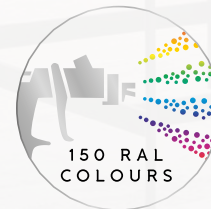

Your Doors are carefully handcrafted at Origin's UK state-of-the-art facility, and as much as innovation is engineered into every minute detail, our goal is for families to take a step back, look at the scene, take it all in and just think 'wow'.

Regardless of your landscape – whether it be city or country – the colour of your Doors is what brings it all together, so should be thought of as your canvas.

Blend, contrast or integrate, use our extensive colour palette as an opportunity to make a statement.

Not only is Origin powder coating flawless, hardwearing and simply exquisite, but it's also one of the reasons why the Soho External Door is guaranteed for up to 20-years.

Security beyond expectations...

The Soho External Door complies and exceeds all required security accreditations including PAS 24:2022.

In addition to security being an integral part of our in-house R & D department's design priority, safety will always play a pivotal role. Finger safe gaskets, magnetic catches and optional door restrictors are all offered to keep the family out of harm's way.

Hardware as
exclusive as the
door itself...

Solid yet delicate to touch, reassuring yet seamless to operate, the quality of the handle can be seen, felt and heard every time it's engaged with.

The handles are the perfect finishing touch and will make an elegant design statement in any architectural setting.

Performance
meets artisan
quality.

SIGNATURE KNURLED HANDLES
